Subject index

A

Abutment tooth movement, effect of partial denture clasp design on (Cecconi, Asgar, and Dootz), 44
fit of removable partial denture base and its effect on (Cecconi, Asgar, and Dootz), 515
removable partial denture, as affected by inclination of residual ridges and type of loading (Cecconi, Asgar, and Dootz), 375
Acrylic resin filling(s), discoloration test of, by organic dye (Fusayama, Hirano, and Kono), 532
materials, new, properties of (Iwaku, Takeuchi, Yamamoto, and Fusayama), 401
pattern for cast dowel and core (Mondelli, Piccino, and Berbert), 413
tooth implant: progress report (Ashman), 342
Adhesion and retention, preparation and evaluation of wetting dentures for (Gesser and Castaldi), 236
Advancements, clinical and research, in cast gold restorations (Christensen), 62
Alginate impression materials and dental stones, compatibility of (Morrow et al.), 556
Allergy as cause of denture sore mouth (Danilewicz-Stysiak), 16
Alloy(s), conventional, spherical-particle alloy, and dispersion-phase alloy, clinical evaluation of corrosion resistance of (Duperon, Nevile, and Kasloff), 650
Alloy(s)—Cont'd
gold-base, observations of onset of sulfide tarnish on (Tuccillo and Nielsen), 629
pontics, chrome-cobalt, for fixed partial dentures (Draddy), 638
sintered gold, for direct restorations (Wolcott and Vernetti), 662
Alveolar bone resorption under complete dentures (Kelsey), 152
ridges, hyperplastic, modified impression technique for (Filler), 609
Amalgam-composite resin restorations, esthetic dental, for posterior teeth (Durnan), 175
restoration in enamel, cavity preparation and (Fusayama), 657
Anatomic, physiologic, and psychologic considerations. Part I. Prosthetic management of edentulous mandibulectomy patients (Cantor and Curtis), 446
Aspiration of denture base materials, (Schneider and Roistacher), 493
Atresia, oronasal (Malson), 72
Attachment-retained distal extension removable partial dentures, impression techniques for (Preiskel), 620
Axial crown contours (Perel), 642

B

Bar, bent lingual, unbending the (Kelly), 668
Base, denture, and teeth, resilient material used between: preliminary report (Bernhausen), 258
materials, denture, aspiration of (Schneider and Roistacher), 493

January, pp. 1-116; February, pp. 117-226; March, pp. 227-362; April, pp. 363-466; May, pp. 467-584; June, pp. 585-712.

Base—Cont'd
permanent type, for transferring interocclusal records, laboratory and clinical study on (Yarmand and Gehl), 497
removable partial denture, fit of, and its effect on abutment tooth movement (Cecconi, Asgar, and Dootz), 515
trial denture, technique for construction of (Hope, Lee, and Schmidt), 458
Biologic and diagnostic aspects. Part I. Radicular pulpotomy for category III pulps (Baume, Holz, and Risk), 418
Bone resorption, alveolar, under complete dentures (Kelsey), 152
Book review(s), 223, 576

C

Cast dowel and core, acrylic resin pattern for (Mondelli, Piccino, and — Berbert), 413
gold restorations, clinical and research advancements in (Christensen), 62
restorations, simplified technique for fitting (Kilpatrick), 540
shell veneer crowns (Collett), 177
Category III pulps, radicular pulpotomy for. Part I. Biologic and diagnostic aspects (Baume, Holz, and Risk), 418
Part II. Instrumentation and technique (Baume, Holz, and Risk), 525
Cavity preparation and amalgam restoration in enamel (Fusayama), 657
Centric relation, improved interocclusal record of (Wirth and Aplin), 279
using term (Avant), 12
Chrome-cobalt alloy pontics for fixed partial dentures (Draddy), 638
Chromium-cobalt removable partial dentures, making: modified technique (Lanier, Rudd, and Strunk), 197
Clasp design, partial denture, effect of, on abutment tooth movement (Cecconi, Asgar, and Dootz), 44
forces, measurement of, on teeth (Clayton and Jaslow), 21
Clinical applications, occlusal study with (Schwartzenhauer), 92
evaluation of corrosion resistance of conventional alloy, spherical-particle alloy, and dispersion-phase alloy (Duperon, Nevile, and Kasloff), 650
of gagging denture patient (Kovats), 613
Part III. Prosthetic management of edentulous mandibulectomy patients (Cantor and Curtis), 670
and histologic evaluation of commercially prepared radiopaque denture material (Elzay, Pearson, and Irish), 251
and laboratory study on permanent type base for transferring interocclusal records (Yarmand and Gehl), 497
procedures. Part II. Prosthetic management of edentulous mandibulectomy patients (Cantor and Curtis), 546
and research advancements in cast-gold restorations (Christensen), 62
use of polymer-coated metal pins as endosteal implants (Hodosh, Shklar, and Povar), 85
Cobalt, chromium-, removable partial dentures, making: modified technique (Lanier, Rudd, and Strunk), 197
Commercially prepared radiopaque denture material, clinical and histologic evaluation of (Elzay, Pearson, and Irish), 251
Complete denture(s), alveolar bone resorption under (Kelsey), 152
intolerance, load factor in (Thomson), 4
lined with soft-curing resins, retention of (Bláhová and Neumann), 371
processing changes in, effect of investing material on (Tucker and Freeman), 206
prosthodontics, preservation and prevention in, role of occlusion in (Ortman), 121
reliability of pre-extraction records for (Smith), 592
relining, with minimum occlusal error (Shaffer and Filler), 366

Complete denture(s)—Cont'd
retention of, physical factors in (Bláhová and Neumann), 230
Composite resins to restore mutilated teeth (Spalten), 323
Conditioners, tissue (von Krammer K.), 244
Contouring cranial prostheses, radiographic grid for (Firtell, Moore, and Bartlett), 439
Conventional alloy, spherical-particle alloy, and dispersion-phase alloy, clinical evaluation of corrosion resistance of (Duperon, Nevile, and Kasloff), 650
Core and dowel, cast, acrylic resin pattern for (Mondelli, Piccino, and Berbert), 413
Corrosion resistance of conventional alloy, spherical-particle alloy, and dispersion-phase alloy, clinical evaluation of (Duperon, Nevile, and Kasloff), 650
Cranial prostheses, contouring, radiographic grid for (Firtell, Moore, and Bartlett), 439
Crown(s), cast shell veneer (Collett), 177
contours, axial (Perel), 642
porcelain bonded to gold, two-dimensional photoelastic stress analysis of. Part IX. Experimental stress analysis of dental restorations (Nally, Farah, and Craig), 307

D

Dam, rubber, rubber-base impressions over (Elderton), 57
Dental amalgam-composite resin restorations, esthetic, for posterior teeth (Durnan), 175
stones, compatibility of alginate impression materials and (Morrow et al.), 556
Dentists considered especially proficient in prosthodontics, guidelines for determination of (Federation of Prosthodontic Organizations), 572
Dentulous and edentulous subjects, oral stereognosis in (Litvak, Silverman, and Garfinkel), 139
stock trays, evaluating size of (Wiland), 317
Denture(s) abutment tooth movement, removable partial, as affected by inclination of residual ridges and type of loading (Cecconi, Asgar, and Dootz), 375
attachment-retained distal extension removable partial, impression techniques for (Preiskel), 620
base materials, aspiration of (Schneider and Roistacher), 493
removable partial, fit of, and its effect on abutment tooth movement (Cecconi, Asgar, and Dootz), 515
and teeth, resilient material used between: preliminary report (Bernhausen), 258
trial, technique for construction of (Hope, Lee, and Schmidt), 458
chromium-cobalt removable partial, making: modified technique (Lanier, Rudd, and Strunk), 197
clasp design, partial, effect of, on abutment tooth movement (Cecconi, Asgar, and Dootz), 44
complete, alveolar bone resorption under (Kelsey), 152
lined with soft-curing resins, retention of (Bláhová and Neumann), 371
processing changes in, effect of investing material on (Tucker and Freeman), 206
reliability of pre-extraction records for (Smith), 592
relining, with minimum occlusal error (Shaffer and Filler), 366
retention of, physical factors in (Bláhová and Neumann), 230
fixed partial, chrome-cobalt alloy pontics for (Draddy), 638
intraoral repair of (Miller and Thayer), 382
intolerance, complete, load factor in (Thomson), 4
material, commercially prepared radiopaque, clinical and histologic evaluation of (Elzay, Pearson, and Irish), 251
patient, gagging, clinical evaluation of (Kovats), 613

Denture(s)—Cont'd
preparation and evaluation of wetting, for adhesion and retention (Gesser and Castaldi), 236
prosthodontics, complete, preservation and prevention in, role of occlusion in (Ortman), 121
removable partial, fulcrum and retention lines in planning (Avant), 162
retention of, factors that influence (Avant), 265
sore mouth, allergy as cause of (Danilewicz-Stysiak), 16
Diagnostic and biologic aspects. Part I. Radicular pulpotomy for category III pulps (Baume, Holz, and Risk), 418
Dimensions and displacement patterns of posterior palatal seal (Silverman), 470
Directory, 115, 225, 361, 465, 583, 693
Discoloration test of acrylic resin fillings by organic dye (Fusayama, Hirano, and Kono), 532
Dispersion-phase alloy, conventional alloy, and spherical-particle alloy, clinical evaluation of corrosion resistance of (Duperon, Nevile, and Kasloff), 650
Displacement patterns, and dimensions, of posterior palatal seal (Silverman), 470
Distal extension removable partial dentures, attachment-retained, impression techniques for (Preiskel), 620
Dowel and core, cast, acrylic resin pattern for (Mondelli, Piccino and Berbert), 413
Dye, organic, discoloration test of acrylic resin fillings by (Fusayama, Hirano, and Kono), 532
Dysarthric patient, speech intelligibility of, effects of palatal lift prosthesis upon (Marshall and Jones), 327

E

Edentulous areas, tooth movement into (Love and Adams), 271
and dentulous subjects, oral stereognosis in (Litvak, Silverman, and Garfinkel), 139
Edentulous—Cont'd
mandibulectomy patients, prosthetic management of. Part I. Anatomic, physiologic, and psychologic considerations (Cantor and Curtis), 446
Part II. Clinical procedures (Cantor and Curtis), 546
Part III. Clinical evaluation (Cantor and Curtis), 670
Embedded stylus models—occlusion teaching aid (Moberg and Thayer), 397
Enamel, cavity preparation and amalgam restoration in (Fusayama), 657
porcelain, and gold, studies on wear of (Monasky and Taylor), 299
Endosteal implants, clinical use of polymer-coated metal pins as (Hodosh, Shklar, and Povar), 85
Esthetic(s) dental amalgam-composite resin restorations for posterior teeth (Durnan), 175
—enigma (Beder), 588
Experimental stress analysis of dental restorations. Part IX. Two-dimensional photoelastic stress analysis of porcelain bonded to gold crowns (Nally, Farah, and Craig), 307

F

Facial moulage, plastic, fabrication of (Pflughoeft and Shearer), 567
Federation of Prosthodontic Organizations: voice of prosthodontics (Block and Wood), 684
Filling(s), acrylic resin, discoloration test of, by organic dye (Fusayama, Hirano, and Kono), 532
materials, new acrylic resin, properties of (Iwaku, Takeuchi, Yamamoto, and Fusayama), 401
Fixed partial dentures, chrome-cobalt alloy pontics for (Draddy), 638
intraoral repair of (Miller and Thayer), 382
Forces, clasp, measurement of, on teeth (Clayton and Jaslow), 21
Fulcrum and retention lines in planning removable partial dentures (Avant), 162
temporomandibular joints (Fountain), 78

G

Gagging denture patient, clinical evaluation of (Kovats), 613
Gold alloy, sintered, for direct restorations (Wolcott and Vernetti), 662
base alloys, observations of onset of sulfide tarnish on (Tuccillo and Nielsen), 629
crowns, porcelain bonded to, two-dimensional photoelastic stress analysis of. Part IX. Experimental stress analysis of dental restorations (Nally, Farah, and Craig), 307
porcelain, and enamel, studies on wear of (Monasky and Taylor), 299
restorations, cast-, clinical and research advancements in (Christensen), 62
Graphic recordings of mandibular movements: research criteria (Clayton, Kotowicz, and Myers), 287
Grid, radiographic, for contouring cranial prostheses (Firtell, Moore, and Bartlett), 439
Guidelines for determination of dentists considered especially proficient in prosthodontics (Federation of Prosthodontic Organizations), 572

H

Histologic and clinical evaluation of commercially prepared radiopaque denture material (Elzay, Pearson, and Irish), 251
Home reliners—where we have failed (Tautin), 19
Hyperplastic alveolar ridges, modified impression technique for (Filler), 609

I

Implant(s), acrylic resin tooth: progress report (Ashman), 342
endosteal, clinical use of polymer-coated metal pins as (Hodosh, Shklar, and Povar), 85
Impression material(s), alginate, and dental stones, compatibility of (Morrow et al.), 556
rubber-base, wash technique using (Calomeni), 520
Impression material(s)—Cont'd
rubber-base, over rubber dam (Elderton), 57
technique(s) for attachment-retained distal extension removable partial dentures (Preiskel), 620
modified, for hyperplastic alveolar ridges (Filler), 609
Inlay investing techniques, five, evaluation of, employed with different types of wax patterns (Jenkins and Phillips), 211
Instrumentation and technique. Part II. Radicular pulpotomy for category III pulps (Baume, Holz, and Risk), 525
Interocclusal record(s) of centric relation, improved (Wirth and Aplin), 279
permanent type base for, laboratory and clinical study on (Yarmand and Gehl), 497
registrations, wax, determination of accuracy of (Millstein, Kronman, and Clark), 189
Intraoral repair of fixed partial dentures (Miller and Thayer), 382
Investing material, effect of, on processing changes in complete dentures (Tucker and Freeman), 206
techniques, five inlay, evaluation of, employed with different types of wax patterns (Jenkins and Phillips), 211

J

Joint(s) syndrome, temporomandibular, and occlusion (Posselt), 432
temporomandibular—fulcrum (Fountain), 78

L

Laboratory and clinical study on permanent type base for transferring interocclusal records (Yarmand and Gehl), 497
Lingual bar, bent, unbending the (Kelly), 668
Load factor in complete denture intolerance (Thomson), 4

Loading, type of, and inclination of residual ridges, removable partial denture abutment tooth movement as affected by (Cecconi, Asgar, and Dootz), 375

M

Magnets, use of, in maxillofacial prosthesis (Javid), 334
Mandible, rest position of, comparison of four methods to determine (Wagner), 506
Mandibular movements, graphic recordings of: research criteria (Clayton, Kotowicz, and Myers), 287
of monkey (Burch and Lundeen), 183
and occlusion, pantographic tracings of (Clayton, Kotowicz, and Zahler), 389
Mandibulectomy patients, edentulous, prosthetic management of. Part I. Anatomic, physiologic, and psychologic considerations (Cantor and Curtis), 446
Part II. Clinical procedures (Cantor and Curtis), 546
Part III. Clinical evaluation (Cantor and Curtis), 670
Material(s), denture base, aspiration of (Schneider and Roistacher), 493
impression, and dental stones, compatibility of (Morrow et al.), 556
rubber-base impression, wash technique using (Calomeni), 520
Maxillofacial prosthesis, use of magnets in (Javid), 334
Maxillomandibular registrations, recording, with maximum retention and stability (Loo), 348
Measurement of clasp forces on teeth (Clayton and Jaslow), 21
Metal pins, polymer-coated, clinical use of, as endosteal implants (Hodosh, Shklar, and Povar), 85
Methods, four, to determine rest position of mandible, comparison of (Wagner), 506
Monkey, mandibular movements of (Burch and Lundeen), 183
Moulage, plastic facial, fabrication of (Pflughoeft and Shearer), 567
Mutilated teeth, composite resins to restore (Spalten), 323

O

Obturators, tracheotomy, fabrication of (Harley and Rothwell), 679
Occlusal error, minimum, relining complete dentures with (Shaffer and Filler), 366
study with clinical applications (Schwartzenhauer), 92
Occlusion and mandibular movements, pantographic tracings of (Clayton, Kotowicz, and Zahler), 389
role of, in preservation and prevention in complete denture prosthodontics (Ortman), 121
teaching aid—embedded stylus models (Moberg and Thayer), 397
and temporomandibular joint syndrome (Posselt), 432
Oral stereognosis in dentulous and edentulous subjects (Litvak, Silverman, and Garfinkel), 139
Organic dye, discoloration test of acrylic resin fillings by (Fusayama, Hirano, and Kono), 532
Organizations, Federation of Prosthodontic: voice of prosthodontics (Block and Wood), 684
Oronasal atresia (Malson), 72

P

Palatal lift prosthesis, effects of, upon speech intelligibility of dysarthric patient (Marshall and Jones), 327
seal, posterior, dimensions and displacement patterns of (Silverman), 470
Pantographic tracings of mandibular movements and occlusion (Clayton, Kotowicz, and Zahler), 389
Partial denture(s) abutment tooth movement, removable, as affected by inclination of residual ridges and type of loading (Cecconi, Asgar, and Dootz), 375
attachment-retained distal extension removable, impression techniques for (Preiskel), 620
base, removable, fit of, and its effect on abutment tooth movement (Cecconi, Asgar, and Dootz), 515

Partial denture(s)—Cont'd
chromium-cobalt removable, making: modified technique (Lanier, Rudd, and Strunk), 197
clasp design, effect of, on abutment tooth movement (Cecconi, Asgar, and Dootz), 44
fixed, chrome-cobalt alloy pontics for (Draddy), 638
intraoral repair of (Miller and Thayer), 382
removable, fulcrum and retention lines in planning (Avant), 162
retention of, factors that influence (Avant), 265
prosthesis, removable, maintaining supporting structures with (Kratochvil), 167
Pattern(s), acrylic resin, for cast dowel and core (Mondelli, Piccino, and Berbert), 413
displacement, and dimensions, of posterior palatal seal (Silverman), 470
Permanent type base for transferring interocclusal records, laboratory and clinical study on (Yarmand and Gehl), 497
Photoelastic stress analysis of porcelain bonded to gold crowns, two-dimensional. Part IX. Experimental stress analysis of dental restorations (Nally, Farah, and Craig), 307
Physical factors in retention of complete dentures (Bláhová and Neumann), 230
Physiologic, anatomic, and psychologic considerations. Part I. Prosthetic management of edentulous mandibulectomy patients (Cantor and Curtis), 446
Pins, polymer-coated metal, clinical use of, as endosteal implants (Hodosh, Shklar, and Povar), 85
Plastic facial moulage, fabrication of (Pflughoeft and Shearer), 567
Polymer-coated metal pins, clinical use of, as endosteal implants (Hodosh, Shklar, and Povar), 85
Pontics, chrome-cobalt alloy, for fixed partial dentures (Draddy), 638
Porcelain bonded to gold crowns, two-dimensional photoelastic stress analysis of. Part IX. Experimental stress analysis of dental restorations (Nally, Farah, and Craig), 307
enamel, and gold, studies on wear of (Monasky and Taylor), 299
Position, rest, of the mandible, comparison of four methods to determine (Wagner), 506
Posterior palatal seal, dimensions and displacement patterns of (Silverman), 470
teeth, esthetic dental amalgam-composite resin restorations for (Durnan), 175
Postgraduate and refresher courses, 104, 353, 577
Pre-extraction records for complete dentures, reliability of (Smith), 592
Preservation and prevention in complete denture prosthodontics, role of occlusion in (Ortman), 121
in prosthodontics (Bascom), 489
Prevention and preservation in complete denture prosthodontics, role of occlusion in (Ortman), 121
Processing changes in complete dentures, effect of investing material on (Tucker and Freeman), 206
Prostheses, cranial, radiographic grid for contouring (Firtell, Moore, and Bartlett), 439
Prosthesis, maxillofacial, use of magnets in (Javid), 334
palatal lift, effects of, upon speech intelligibility of dysarthric patient (Marshall and Jones), 327
removable partial, maintaining supporting structures with (Kratochvil), 167
silicone rubber, surface characterization of (Bartlett, Pineda, and Moore), 69
Prosthetic management of edentulous mandibulectomy patients. Part I. Anatomic, physiologic, and psychologic considerations (Cantor and Curtis), 446
Part II. Clinical procedures (Cantor and Curtis), 546
Part III. Clinical evaluation (Cantor and Curtis), 670

Prosthodontic(s), complete denture, preservation and prevention in, role of occlusion in (Ortman), 121
guidelines for determination of dentists considered especially proficient in (Federation of Prosthodontic Organizations), 572
Organizations, Federation of: voice of prosthodontics (Block and Wood), 684
preservation in (Bascom), 489
Psychologic, anatomic, and physiologic considerations. Part I. Prosthetic management of edentulous mandibulectomy patients (Cantor and Curtis), 446
Pulpotomy, radicular, for category III pulps. Part I. Biologic and diagnostic aspects (Baume, Holz, and Risk), 418
Part II. Instrumentation and technique (Baume, Holz, and Risk), 525
Pulps, category III, radicular pulpotomy for. Part I. Biologic and diagnostic aspects (Baume, Holz, and Risk), 418
Part II. Instrumentation and technique (Baume, Holz, and Risk), 525

R

Radicular pulpotomy for category III pulps. Part I. Biologic and diagnostic aspects (Baume, Holz, and Risk), 418
Part II. Instrumentation and technique (Baume, Holz, and Risk), 525
Radiographic grid for contouring cranial prostheses (Firtell, Moore, and Bartlett), 439
Radiopaque denture material, commercially prepared, clinical and histologic evaluation of (Elzay, Pearson, and Irish), 251
Readers' round table, 99, 221, 574, 692
Record(s), improved interocclusal, of centric relation (Wirth and Aplin), 279
interocclusal, permanent type base for transferring, laboratory and clinical study on (Yarmand and Gehl), 497
Record(s)—Cont'd
pre-extraction, for complete dentures, reliability of (Smith), 592
Recording(s), graphic, of mandibular movements: research criteria (Clayton, Kotowicz, and Myers), 287
maxillomandibular registrations with maximum retention and stability (Loo), 348
Registrations, maxillomandibular, recording, with maximum retention and stability (Loo), 348
wax interocclusal, determination of accuracy of (Millstein, Kronman, and Clark), 189
Reliners, home—where we have failed (Tautin), 19
Relining complete dentures with minimum occlusal error (Shaffer and Filler), 366
Removable partial denture(s) abutment tooth movement as affected by inclination of residual ridges and type of loading (Cecconi, Asgar, and Dootz), 375
attachment-retained distal extension, impression techniques for (Preiskel), 620
base, fit of, and its effect on abutment tooth movement (Cecconi, Asgar, and Dootz), 515
chromium-cobalt, making: modified technique (Lanier, Rudd, and Strunk), 197
fulcrum and retention lines in planning (Avant), 162
retention of, factors that influence (Avant), 265
prosthesis, maintaining supporting structures with (Kratochvil), 167
Research advancements, and clinical, in cast-gold restorations (Christensen), 62
criteria: graphic recordings of mandibular movements (Clayton, Kotowicz, and Myers), 287
Residual ridges, inclination of, and type of loading, removable partial denture abutment tooth movement as affected by (Cecconi, Asgar, and Dootz), 375

Resilient material used between teeth and denture base: preliminary report (Bernhausen), 258
Resin(s), composite, to restore mutilated teeth (Spalten), 323
filling(s), acrylic, discoloration test of, by organic dye (Fusayama, Hirano, and Kono), 532
materials, new acrylic, properties of (Iwaku, Takeuchi, Yamamoto, and Fusayama), 401
pattern, acrylic, for cast dowel and core (Mondelli, Piccino, and Berbert), 413
restorations, esthetic dental amalgam-composite, for posterior teeth (Durnan), 175
soft-curing, complete dentures lined with, retention of (Bláhová and Neumann), 371
tooth implant, acrylic: progress report (Ashman), 342
Resorption, alveolar bone, under complete dentures (Kelsey), 152
Rest position of mandible, comparison of four methods to determine (Wagner), 506
Restoration(s), amalgam, in enamel, cavity preparation and (Fusayama), 657
cast-gold, clinical and research advancements in (Christensen), 62
simplified technique for (Kilpatrick), 540
dental, experimental stress analysis of. Part IX. Two-dimensional photoelastic stress analysis of porcelain bonded to gold crowns (Nally, Farah, and Craig), 307
direct, sintered gold alloy for (Wolcott and Vernetti), 662
esthetic dental amalgam-composite resin, for posterior teeth (Durnan), 175
Retention and adhesion, preparation and evaluation of wetting dentures for (Gesser and Castaldi), 236
of complete dentures lined with soft-curing resins (Bláhová and Neumann), 371
physical factors in (Bláhová and Neumann), 230
and fulcrum lines in planning removable partial dentures (Avant), 162
Retention—Cont'd
of removable partial dentures, factors that influence (Avant), 265
and stability, maximum, recording maxillomandibular registrations with (Loo), 348
Ridges, hyperplastic alveolar, modified impression technique for (Filler), 609
residual, inclination of, and type of loading, removable partial denture abutment tooth movement as affected by (Cecconi, Asgar, and Dootz), 375
Rubber-base impression(s) material, wash technique using (Calomeni), 520
over rubber dam (Elderton), 57
dam, rubber-base impressions over (Elderton), 57
prosthesis, silicone, surface characterization of (Bartlett, Pineda, and Moore), 69

S

Seal, posterior palatal, dimensions and displacement patterns of (Silverman), 470
Shell veneer crowns, cast (Collett), 177
Silicone rubber prosthesis, surface characterization of (Bartlett, Pineda, and Moore), 69
Sintered gold alloy for direct restorations (Wolcott and Vernetti), 662
Size of dentulous stock trays, evaluating (Wiland), 317
Soft-curing resins, complete dentures lined with, retention of (Bláhová and Neumann), 371
Speech intelligibility of dysarthric patient, effects of palatal lift prosthesis upon (Marshall and Jones), 327
Spherical-particle alloy, conventional alloy, and dispersion-phase alloy, clinical evaluation of corrosion resistance of (Duperon, Nevile, and Kasloff), 650
Stability and retention, maximum, recording maxillomandibular registrations with (Loo), 348
Stereognosis, oral, in dentulous and edentulous subjects (Litvak, Silverman, and Garfinkel), 139

Stock trays, dentulous, evaluating size of (Wiland), 317
Stones, dental, compatibility of alginate impression materials and (Morrow et al.), 556
Stress analysis of dental restorations, experimental. Part IX. Two-dimensional photoelastic stress analysis of porcelain bonded to gold crowns (Nally, Farah, and Craig), 307
Stylus models, embedded—occlusion teaching aid (Moberg and Thayer), 397
Sulfide tarnish on gold-base alloys, observations of onset of (Tuccillo and Nielsen), 629
Supporting structures, maintaining, with removable partial prosthesis (Kratochvil), 167
Surface characterization of silicone rubber prosthesis (Bartlett, Pineda and Moore), 69
Syndrome, temporomandibular joint, and occlusion (Posselt), 432

T

Tarnish, sulfide, on gold-base alloys, observations of onset of (Tuccillo and Nielsen), 629
Teaching aid, occlusion—embedded stylus models (Moberg and Thayer), 397
Technique(s) for construction of trial denture base (Hope, Lee, and Schmidt), 458
five inlay investing, evaluation of, employed with different types of wax patterns (Jenkins and Phillips), 211
impression, for attachment-retained distal extension removable partial dentures (Preiskel), 620
and instrumentation. Part II. Radicular pulpotomy for category III pulps (Baume, Holz, and Risk), 525
modified impression, for hyperplastic alveolar ridges (Filler), 609
making chromium-cobalt removable partial dentures (Lanier, Rudd, and Strunk), 197
simplified, for fitting cast restorations (Kilpatrick), 540
Technique(s)—Cont'd
wash, using rubber-base impression material (Calomeni), 520
Teeth and denture base, resilient material used between: preliminary report (Bernhausen), 258
measurement of clasp forces on (Clayton and Jaslow), 21
mutilated, composite resins to restore (Spalten), 323
posterior, esthetic dental amalgam-composite resin restorations for (Durnan), 175
Temporomandibular joint(s)—fulcrum (Fountain), 78
syndrome and occlusion (Posselt), 432
Test, discoloration, of acrylic resin fillings by organic dye (Fusayama, Hirano, and Kono), 532
Through eyes of editor (Boucher), 1, 117, 227, 363, 467, 585
Tissue conditioners (von Krammer K.), 244
Tooth implant, acrylic resin: progress report (Ashman), 342
movement, abutment, effect of partial denture clasp design on (Cecconi, Asgar, and Dootz), 44
fit of removable partial denture base and its effect on (Cecconi, Asgar, and Dootz), 515
into edentulous areas (Love and Adams), 271
removable partial denture abutment, as affected by inclination of residual ridges and type of loading (Cecconi, Asgar, and Dootz), 375
Tracheotomy obturators, fabrication of (Harley and Rothwell), 679
Tracings, pantographic, of mandibular movements and occlusion (Clayton, Kotowicz, and Zahler), 389
Trays, dentulous stock, evaluating size of (Wiland), 317
Trial denture base, technique for construction of (Hope, Lee, and Schmidt), 458
Two-dimensional photoelastic stress analysis of porcelain bonded to gold crowns. Part IX. Experimental stress analysis of dental restorations (Nally, Farah, and Craig), 307

V

Veneer crowns, cast shell (Collett), 177

W

Wash technique using rubber-base impression material (Calomeni), 520

Wax interocclusal registrations, determination of accuracy of (Millstein, Kronman, and Clark), 189

patterns, different types of, evaluation of five inlay investing techniques employed with (Jenkins and Phillips), 211

Subject index

A

Abutment stabilization through endosseous and cross-arch splinting (Augusburger), 406

Adaptation of noncemented pins (Perez R., Schoeneck A., and Yanahara M.), 631

Age, old, problems of, in dental prosthetics and restorative procedures (Boitel), 350

Alveolar ridge skin grafts, surgical stents for vestibuloplasty and (Riley), 511

Amalgam condensation, potential of, causing intrusion of capping materials into pulp (Mitchem), 506

pins in: study of reinforcement (Cecconi and Asgar), 159

American Board of Prosthodontics (Lytle), 669

Anatomic mechanism: centric relation and condylar movement (Saizar), 581

Angulation, cusp, effects of change in incisal guide angle on (Christensen), 93

Animals, small laboratory, oral implants in (Murphy), 78

Articulator adjustment, relative repeatability of plaster interocclusal eccentric records for, in construction of complete dentures (Frazier et al.), 456

Hanau H-2, adapting Whip-Mix Quick Mount face-bow to (Kelsey), 437

sliding plane, for surgical correction of malocclusions (Beder), 200

Artificial upper anterior teeth, factors influencing position of (Payne), 26

Autogenous mandibular graft, supportive metallic implant for (Brown), 205

B

Balancing complete denture occlusions, practical approach to (Goodkind), 85

Band and rubber-base impression technique for fixed restorations (Stern), 491

Band-shell, copper, impressions of single preparations using (Kimmelman and Lerman), 154

Block form stability in removable partial prosthodontics (Zoeller and Kelly), 141

Board of Prosthodontics, American (Lytle), 669

Bolus position during chewing, cineradiographic studies of (Wictorin, Hedegård, and Lundberg), 236

Bone resorption, mandibular vertical, measuring, by radiographic cephalometry (Vierheller, Speiser, and Al-Rahmani), 33

Book review(s), 100, 442, 555

Breakage, lower denture, Vitallium strengthener to prevent (Berry and Funk), 532

C

Capping materials, potential of amalgam condensation causing intrusion of, into pulp (Mitchem), 506

Cast duplication, accurate, rapid method for (Morrow and Rudd), 665

gold full crowns, effect of venting on (Cooper et al.), 621

Castings, dental, double-die system for making (Lies), 424

Category III pulps, radicular pulpotomy of. Part III. Histologic evaluation (Baume, Holz, and Risk), 649

Cement restorations, silicate, influence of, on gingiva (Larato), 186

solubility of, as related to time of exposure in water (Swartz, Sears, and Phillips), 501

Centric relation and condylar movement: anatomic mechanism (Saizar), 581

July, pp. 1-106; August, pp. 107-232; September, pp. 233-346; October, pp. 347-444; November, pp. 444-566; December, pp. 567-704.

XUM

Cephalometric, clinical, and densitometric study of reduction of residual ridges (Atwood and Coy), 280
Cephalometry, radiographic, measuring mandibular vertical bone resorption by (Vierheller, Speiser, and Al-Rahmani), 33
Checkbite-impressions, functional, for fixed prosthodontics (Getz), 146
Chew-in wax records, functional, stabilizing (King), 601
Chewing, cineradiographic studies of bolus position during (Wictorin, Hedegård, and Lundberg), 236
Cineradiographic studies of bolus position during chewing (Wictorin, Hedegård, and Lundberg), 236
Class II restorations, one-year observations on composite resin for (Phillips et al.), 68
Cleft palate prostheses, effect of, on respiratory effort (Wood and Warren), 213
Clinical, cephalometric, and densitometric study of reduction of residual ridges (Atwood and Coy), 280
research, value of subjective evaluation in (Rayson et al.), 111
Complete denture(s), construction of, relative repeatability of plaster interocclusal eccentric records for articulator adjustment in (Frazier et al.), 456
incidence of lateral excursions during function with (Sheppard and Sheppard), 258
near or full occlusal vertical dimension increase of severely reduced interarch distance in (Owen and Douglas), 134
occlusions, practical approach to balancing (Goodkind), 85
opposing natural teeth (Bruce), 448
physical retention of (Barbenel), 592
relining techniques for (Christensen), 373
single (Ellinger, Rayson, and Henderson), 4
telescoped: research report at clinical level (Schweitzer, Schweitzer, and Schweitzer), 357
tooth-supported (Kabcenell), 251
treatment and extraction, changes in soft-tissue profile following (Ismail), 11
Composite resin(s) for Class II restorations, one-year observations on (Phillips et al.), 68
strength parameters of (Reisbick and Brodsky), 178
Condensation, amalgam, potential of, causing intrusion of capping materials into pulp (Mitchem), 506
Condylar movement and centric relation: anatomic mechanism (Saizar), 581
Connector, nonrigid subocclusal, for fixed partial dentures (Guyer), 433
Contours, crown, periodontal considerations of (Perel), 627
Copper band-shell, impressions of single preparations using (Kimmelman and Lerman), 154
Coverage, full and partial, and role of pins (Pruden), 302
Cross-arch and endosseous splinting, abutment stabilization through (Augsburger), 406
Crown(s), cast gold full, effect of venting on (Cooper et al.), 621
contours, periodontal considerations of (Perel), 627
Cusp angulation, effects of change in incisal guide angle on (Christensen), 93
Custom tray, alternate, for elastic impression techniques (Stackhouse), 219

D

Dehydration of dentin by some restorative materials (Johnson and Brännström), 307
Densitometric, clinical, and cephalometric study of reduction of residual ridges (Atwood and Coy), 280
Dental materials, selected restorative, tensile strengths of (Hannah and Smith), 314
Dentin, dehydration of, by some restorative materials (Johnson and Brännström), 307
Dentist and dental laboratory technician: fixed prosthodontics (Abramowsky), 537
Denture(s) breakage, lower, Vitallium strengthener to prevent (Berry and Funk), 532
complete, construction of, relative repeatability of plaster interocclusal eccentric records for articulator adjustment in (Frazier et al.), 456

XUM

Denture(s), complete—Cont'd
incidence of lateral excursions during function with (Sheppard and Sheppard), 258
near or full occlusal vertical dimension increase of severely reduced interarch distance in (Owen and Douglas), 134
opposing natural teeth (Bruce), 448
physical retention of (Barbenel), 592
relining techniques for (Christensen), 373
existing, taking advantage of (Vig), 247
fixed partial, nonrigid subocclusal connector for (Guyer), 433
simplified technique for construction of (Azarmehr and Yarmand), 429
impaction of, in esophagus (Phillips), 222
implant, histologic studies of human mandible supporting. Part II (Bodine and Mohammed), 415
mold liner, silicone as (Reisbick), 382
occlusion (Sheppard and Sheppard), 468
complete, practical approach to balancing (Goodkind), 85
produced with pour-type resin and with heat-processed materials, comparison between dimensional accuracy of (Grant and Atkinson), 296
removable partial, instructions for use and care of (Wagner), 477
simplification, introduction to (Pound and Murrell), 570
single complete (Ellinger, Rayson, and Henderson), 4
telescoped complete: research report at clinical level (Schweitzer, Schweitzer, and Schweitzer), 357
tooth-supported complete (Kabcenell), 251
treatment, complete, and extraction, changes in soft-tissue profile following (Ismail), 11
Diagnosis, oral, and treatment planning, psychoneurosis in (Vosburg), 328
Dimensional accuracy of dentures produced with pour-type resin and with heat-processed materials, comparison between (Grant and Atkinson), 296
Directory, 105, 231, 345, 433, 686
Disc, interarticular, in wide mandibular opening in rhesus monkeys (Ramfjord and Blankenship), 189
Disease entity, major oral: reduction of residual ridges (Atwood), 266
Displacement, anterior, of mandible in adult rhesus monkeys: long-term observations (Ramfjord and Enlow), 517
Double-die system for making dental castings (Lies), 424
Duplication, accurate cast, rapid method for (Morrow and Rudd), 665
Dysfunction, temporomandibular, and pain, neuromuscular disturbances causing (Bruno), 387

E

Eccentric records, plaster interocclusal, relative repeatability of, for articulator adjustment in construction of complete dentures (Frazier), 456
Edentulous impression procedure for region of mentalis muscles (Shannon), 130
Elastic impression techniques, alternate custom tray for (Stackhouse), 219
Endosseous and cross-arch splinting, abutment stabilization through (Augsburger), 406
Esophagus, impaction of dentures in (Phillips), 222
Esthetics, improving, by recontouring natural teeth (Brehm), 497
instant photographs for developing (Roraff), 21
Evaluation, subjective, value of, in clinical research (Rayson et al.), 111
Excursions, lateral, incidence of, during function with complete dentures (Sheppard and Sheppard), 258
Exposure time in water, solubility of cement as related to (Swartz, Sears, and Phillips), 501
Extraction and complete denture treatment, changes in soft-tissue profile following (Ismail), 11
tooth, in monkeys, residual ridge remodeling after (Pietrokovski and Massler), 119

F

Face-bow, Whip-Mix Quick Mount, adapting, to Hanau H-2 articulator (Kelsey), 437

Fixed partial dentures, nonrigid subocclusal connector for (Guyer), 433
simplified technique for construction of (Azarmehr and Yarmand), 429
prosthodontics, functional checkbite-impressions for (Getz), 146
restorations, band and rubber-base impression technique for (Stern), 491
Fixed-removable prostheses, combinations in (Pipko), 481
Full crowns, cast gold, effect of venting on (Cooper et al.), 621
Function with complete dentures, incidence of lateral excursions during (Sheppard and Sheppard), 258
Functional chew-in wax records, stabilizing (King), 601
movements of mandible (Gibbs et al.), 604
studies, simulated, of temporomandibular joints (El Mahdy), 658

G

Gingiva, healing effect on, gingival retraction techniques and their (Xhonga), 640
influence of silicate cement restorations on (Larato), 186
Gingival retraction techniques and their healing effect on gingiva (Xhonga), 640
Gold full crowns, cast, effect of venting on (Cooper et al.), 621
Graft(s), alveolar ridge skin, surgical stents for vestibuloplasty and (Riley), 511
autogenous mandibular, supportive metallic implant for (Brown), 205
Guide angle, incisal, effects of change in, on cusp angulation (Christensen), 93

H

Hanau H-2 articulator, adapting Whip-Mix Quick Mount face-bow to (Kelsey), 437
Healing effect on gingiva, gingival retraction techniques and their (Xhonga), 640
Heat-processed materials and pour-type resin, dentures produced with, comparison between dimensional accuracy of (Grant and Atkinson), 296
High-speed preparations and pin channels, paralleling instrument for guidance of (Karlström), 41
Histologic evaluation. Part III. Radicular pulpotomy of category III pulps (Baume, Holz, and Risk), 649
studies of human mandible supporting implant denture. Part II (Bodine and Mohammed), 415

I

Impaction of dentures in esophagus (Phillips), 222
Implant denture, histologic studies of human mandible supporting. Part II (Bodine and Mohammed), 415
Implants, oral, in small laboratory animals (Murphy), 78
supportive metallic, for autogenous mandibular graft (Brown), 205
Impression(s), functional checkbite, for fixed prosthodontics (Getz), 146
procedure, edentulous, for region of mentalis muscles (Shannon), 130
of single preparations using copper bandshell (Kimmelman and Lerman), 154
technique(s), band and rubber-base, for fixed restorations (Stern), 491
technique, elastic, alternate custom tray for (Stackhouse), 219
Incisal guide angle, effects of change in, on cusp angulation (Christensen), 93
Instrument, paralleling, for guidance of pin channels and high-speed preparations (Karlström), 41
Interarch distance, severely reduced, near or full occlusal vertical dimension increase of, in complete dentures (Owen and Douglas), 134
Interarticular disc in wide mandibular opening in rhesus monkeys (Ramfjord and Blankenship), 189
Interocclusal eccentric records, plaster, relative repeatability of, for articulator adjustment in construction of complete dentures (Frazier), 456
Intra-articular tissue in the temporomandibular joint (El Mahdy), 396

J

Joint(s), temporomandibular, intra-articular tissue in (El Mahdy), 396

XUM

Joint(s), temporomandibular—Cont'd
simulated functional studies of (El Mahdy), 658

L

Laboratory technician, dental, and dentist: fixed prosthodontics (Abramowsky), 537
Lateral excursions, incidence of, during function with complete dentures (Sheppard and Sheppard), 258
Liner, denture mold, silicone as (Reisbick), 382

M

Malocclusions, sliding plane articulator of surgical correction of (Beder), 200
Mandible, anterior displacement of, in adult rhesus monkeys: long-term observations (Ramfjord and Enlow), 517
functional movements of (Gibbs et al.), 604
human, histologic studies of, supporting implant denture. Part H (Bodine and Mohammed), 415
Mandibular graft, autogenous, supportive metallic implant for (Brown), 205
opening, wide, in rhesus monkeys, interarticular disc in (Ramfjord and Blankenship), 189
vertical bone resorption, measuring, by radiographic cephalometry (Vierheller, Speiser, and Al-Rahmani), 33
Materials, capping, potential of amalgam condensation causing intrusion of, into pulp (Mitchem), 506
heat-processed, and pour-type resin, dentures produced with, comparison between dimensional accuracy of (Grant and Atkinson), 296
selected restorative dental, tensile strengths of (Hannah and Smith), 314
some restorative, dehydration of dentin by (Johnson and Brännström), 307
Medical writers, six honest serving men for (Asher), 225
Mentalis muscles, edentulous impression procedure for region of (Shannon), 130
Metallic implant, supportive, for autogenous mandibular graft (Brown), 205
Microstomia, prosthetic restoration in (Conroy and Reitzik), 324
Mold liner, denture, silicone as (Reisbick), 382
Monkeys, adult rhesus, anterior displacement of mandible in: long-term observations (Ramfjord and Enlow), 517
residual ridge remodeling after tooth extraction in (Pietrokovski and Massler), 119
rhesus, interarticular disc in wide mandibular opening in (Ramfjord and Blankenship), 189
Mouth preparation, preliminary oral rehabilitation versus (Khera, Ludwig, and Appleby), 139
Movement(s), condylar, and centric relation: anatomic mechanism (Saizar), 581
of mandible, functional (Gibbs et al.), 604
Muscles, mentalis, edentulous impression procedure for region of (Shannon), 130

N

Natural teeth, organization of occlusion for (Reynolds), 56
Neuromuscular disturbances causing temporomandibular dysfunction and pain (Bruno), 387
Noncemented pins, adaptation of (Perez R., Schoenack A., and Yanahara M.), 631
Nose prosthesis, fabrication of (Brown), 543

O

Occlusal vertical dimension increase, near or full, of severely reduced interarch distance in complete dentures (Owen and Douglas), 134
Occlusion(s), complete denture, practical approach to balancing (Goodkind), 85
denture (Sheppard and Sheppard), 468
for natural teeth, organization of (Reynolds), 56
Opening, wide mandibular, in rhesus monkeys, interarticular disc in (Ramfjord and Blankenship), 189

Oral implants in small laboratory animals (Murphy), 78
rehabilitation, preliminary, versus mouth preparation (Khera, Ludwig, and Appleby), 139

P

Pain, neuromuscular disturbances causing temporomandibular dysfunction and (Bruno), 387
Palate prostheses, cleft, effect of, on respiratory effort (Wood and Warren), 213
Paralleling instrument for guidance of pin channels and high-speed preparations (Karlström), 41
Parameters, strength, of composite resins (Reisbick and Brodsky), 178
Partial dentures, fixed, nonrigid subocclusal connector for (Guyer), 433
simplified technique for construction of (Azarmehr and Yarmand), 429
removable, instructions for use and care of (Wagner), 477
prosthodontics, removable, block form stability in (Zoeller and Kelly), 141
Periodontal considerations of crown contours (Perel), 627
Photographs, instant, for developing esthetics (Roraff), 21
Physical retention of complete dentures (Barbenel), 592
Pin(s) in amalgam: study of reinforcement (Cecconi and Asgar), 159
channels and high-speed preparations, paralleling instrument for guidance of (Karlström), 41
noncemented, adaptation of (Perez R., Schoeneck A., and Yanahara M.), 631
role of, full coverage, partial coverage, and (Pruden), 302
Plane articulator, sliding, for surgical correction of malocclusions (Beder), 200
Plaster interocclusal eccentric records, relative repeatability of, for articulator adjustment in construction of complete dentures (Frazier et al.), 456
Postgraduate and refresher courses, 101, 332, 557
Pour-type resin and heat-processed materials, dentures produced with, comparison between dimensional accuracy of (Grant and Atkinson), 296
Preparation(s), controlled tooth (Green), 170
high-speed, and pin channels, paralleling instrument for guidance of (Karlström), 41
mouth, preliminary oral rehabilitation versus (Khera, Ludwig, and Appleby), 139
single, impressions of, using copper bandshell (Kimmelman and Lerman), 154
Procedure(s), edentulous impression, for region of mentalis muscles (Shannon), 130
restorative, and dental prosthetics, problems of old age in (Boitel), 350
Profile, soft-tissue, changes in, following extraction and complete denture treatment (Ismail), 11
Prostheses, cleft palate, effect of, on respiratory effort (Wood and Warren), 213
fixed-removable, combinations in (Pipko), 481
Prosthesis, nose, fabrication of (Brown), 543
Prosthetics, dental, and restorative procedures, problems of old age in (Boitel), 350
Prosthodontics, American Board of (Lytle), 669
fixed: dentist and dental laboratory technician (Abramowsky), 537
functional checkbite-impressions for (Getz), 146
removable partial, block form stability in (Zoeller and Kelly), 141
Psychoneurosis in oral diagnosis and treatment planning (Vosburg), 328
Pulpotomy, radicular, of category III pulps. Part III. Histologic evaluation (Baume, Holz, and Risk), 649
Pulp(s), category III, radicular pulpotomy of. Part III. Histologic evaluation (Baume, Holz, and Risk), 649
potential of amalgam condensation causing intrusion of capping materials into (Mitchem), 506

XUM

R

Radicular pulpotomy of category III pulps. Part III. Histologic evaluation (Baume, Holz, and Risk), 649

Radiographic cephalometry, measuring mandibular vertical bone resorption by (Vierheller, Speiser, and Al-Rahmani), 33

Readers' round table, 99, 228, 685

Recontouring natural teeth, improving esthetics by (Brehm), 497

Records, functional chew-in wax, stabilizing (King), 601

plaster interocclusal eccentric, relative repeatability of, for articulator adjustment in construction of complete dentures (Frazier et al.), 456

Reduction of residual ridges, clinical, cephalometric, and densitometric study of (Atwood and Coy), 280

Rehabilitation, preliminary oral, versus mouth preparation (Khera, Ludwig, and Appleby), 139

Reinforcement, study of: pins in amalgam (Cecconi and Asgar), 159

Relining techniques for complete dentures (Christensen), 373

Remodeling, residual ridge, after tooth extraction in monkeys (Pietrokovski and Massler), 119

Removable partial dentures, instructions for use and care of (Wagner), 477

prosthodontics, block form stability in (Zoeller and Kelly), 141

Research, clinical, value of subjective evaluation in (Rayson et al.), 111

Residual ridge(s), reduction of, clinical, cephalometric, and densitometric study of (Atwood and Coy), 280

major oral disease entity (Atwood), 266

remodeling after tooth extraction in monkeys (Pietrokovski and Massler), 119

Resin(s), composite, for Class II restorations, one-year observations on (Phillips et al.), 68

strength parameters of (Reisbick and Brodsky), 178

pour-type, and heat-processed materials, dentures produced with, comparison between dimensional accuracy of (Grant and Atkinson), 296

Resorption, mandibular vertical bone, measuring, by radiographic cephalometry (Vierheller, Speiser, and Al-Rahmani), 33

Respiratory effort, effect of cleft palate prostheses on (Wood and Warren), 213

Restoration(s), Class II, one-year observations on composite resin for (Phillips et al.), 68

fixed, band and rubber-base impression technique for (Stern), 491

prosthetic, in microstomia (Conroy and Reitzik), 324

silicate cement, influence of, on gingiva (Larato), 186

Restorative dental materials, selected, tensile strengths of (Hannah and Smith), 314

materials, some, dehydration of dentin by (Johnson and Brännström), 307

procedures and dental prosthetics, problems of old age in (Boitel), 350

Retention, physical, of complete dentures (Barbenel), 592

Retraction techniques, gingival, and their healing effect on gingiva (Xhonga), 640

Rhesus monkeys, adult, anterior displacement of mandible in: long-term observations (Ramfjord and Enlow), 517

interarticular disc in wide mandibular opening in (Ramfjord and Blankenship), 189

Ridge(s) remodeling, residual, after tooth extraction in monkeys (Pietrokovski and Massler), 119

residual, reduction of, clinical, cephalometric, and densitometric study of (Atwood and Coy), 280

major oral disease entity (Atwood), 266

Rubber-base and band impression technique for fixed restorations (Stern), 491

S

Serving men, six honest, for medical writers (Asher), 225

Silicate cement restorations, influence of, on gingiva (Larato), 186

Silicone as denture mold liner (Reisbick), 382

Skin grafts, alveolar ridge, surgical stents for vestibuloplasty and (Riley), 511
Sliding plane articulator for surgical correction of malocclusions (Beder), 200
Soft-tissue profile, changes in, following extraction and complete denture treatment (Ismail), 11
Solubility of cement as related to time of exposure in water (Swartz, Sears, and Phillips), 501
Splinting, endosseous and cross-arch, abutment stabilization through (Augsburger), 406
Stabilization, abutment, through endosseous and cross-arch splinting (Augsburger), 406
Stabilizing functional chew-in wax records (King), 601
Stents, surgical, for vestibuloplasty and alveolar ridge skin grafts (Riley), 511
Strength parameters of composite resins (Reisbick and Brodsky), 178
Strengthener, Vitallium, to prevent lower denture breakage (Berry and Funk), 532
Subocclusal connector, nonrigid, for fixed partial dentures (Guyer), 433
Surgical correction of malocclusions, sliding plane articulator for (Beder), 200
System, double-die, for making dental castings (Lies), 424

T

Technician, dental laboratory, and dentist: fixed prosthodontics (Abramowsky), 537
Technique(s), band and rubber-base impression, for fixed restorations (Stern), 491
elastic impression, alternate custom tray for (Stackhouse), 219
gingival retraction, and their healing effect on gingiva (Xhonga), 640
relining, for complete dentures (Christensen), 373
simplified, for construction of fixed partial dentures (Azarmehr and Yarmand), 429
Teeth, artificial upper anterior, factors influencing position of (Payne), 26
natural, complete dentures opposing (Bruce), 448
Teeth—Cont'd
improving esthetics by recontouring (Brehm), 497
organization of occlusion for (Reynolds), 56
Telescoped complete denture: research report at clinical level (Schweitzer, Schweitzer, and Schweitzer), 357
Temporomandibular dysfunction and pain, neuromuscular disturbances causing (Bruno), 387
joint(s), intra-articular tissue in (El Mahdy), 396
simulated functional studies of (El Mahdy), 658
Tensile strengths of selected restorative dental materials (Hannah and Smith), 314
Through eyes of editor (Boucher), 1, 107, 233, 347, 445, 567
Tissue, intra-articular, in temporomandibular joint (El Mahdy), 396
Tooth extraction in monkeys, residual ridge remodeling after (Pietrokovski and Massler), 119
preparation, controlled (Green), 170
Tooth-supported complete dentures (Kabcenell), 251
Tray, alternate custom, for elastic impression techniques (Stackhouse), 219
Treatment, complete denture, and extraction, changes in soft-tissue profile following (Ismail), 11
planning, and oral diagnosis, psychoneurosis in (Vosburg), 328

V

Venting, effect of, on cast gold full crowns (Cooper et al.), 621
Vertical bone resorption, mandibular, measuring, by radiographic cephalometry (Vierheller, Speiser, and Al-Rahmani), 33
dimension increase, near or full occlusal, of severely reduced interarch distance in complete dentures (Owen and Douglas), 134
Vestibuloplasty, surgical stents for, and alveolar ridge skin grafts (Riley), 511
Vitallium strengthener to prevent lower denture breakage (Berry and Funk), 532

XUM

W

Water, solubility of cement as related to time of exposure in (Swartz, Sears, and Phillips), 501

Wax records, functional chew-in, stabilizing (King), 601
